

# PEACOCKPAVERS™

Handcrafted concrete pavers with the look of ancient stone.

*Thank you for wanting to know more about our beautiful architectural-grade pavers.*

Peacock Pavers are unique, beautiful, versatile, durable and affordable, and we're delighted to tell you about them. If we don't answer all your questions here, please call us. Our biggest strength is working with our customers one-on-one to give them the service they need to make their projects spectacular!

# new! NEW! Cobblestone-style pavers for driveways.

They look like Old World cobblestone, but they're actually made of architectural-grade concrete, and they're driveway-strong. Peacock's durable new driveway pavers are 3" thick, with a special interlocking design that allows for secure installation.

No concrete pad is necessary. They also have excellent freeze/thaw characteristics and can be used in many other outdoor applications including retaining walls, terraces and walkways. Like all Peacock Pavers, our 3" pavers are available in four standard colors, buff, champagne, rice white and dolphin grey, and in custom colors.

[ 3" X 6<sup>1</sup>/<sub>8</sub>" X 9<sup>1</sup>/<sub>8</sub>" ]

[ Also available: 3" x 9<sup>1</sup>/<sub>8</sub>" x 9<sup>1</sup>/<sub>8</sub>", 3" x 9<sup>1</sup>/<sub>8</sub>" x 12<sup>1</sup>/<sub>8</sub>" and 3" x 12<sup>1</sup>/<sub>8</sub>" x 12<sup>1</sup>/<sub>8</sub>" ]

new!  
NEW! The model of style  
for remodeled floors.

Discover our newest model of stone-style pavers—concrete pavers made specifically for remodeling and retrofitting. They're just **5/8" thick** yet as durable and beautiful as Old World stone. Made of architectural-grade concrete, they come in a variety of sizes, with trim pieces. They're available in four standard colors, buff, champagne, rice white and dolphin grey, and in custom colors. And they're affordable. The very model of high style at an affordable cost.

# old world

## Old World beauty for today's distinctive styles

Peacock Pavers are remarkable replications of Old World, crosscut European stone. Handcrafted in architectural-grade concrete, they possess the beauty and texture of natural stone, yet they're surprisingly affordable.

They're ideal for numerous interior and exterior applications including floors, terraces, fireplace facings, water features, pool deckings,

interior-exterior transitional areas and more. Even driveways. And they compliment virtually any design style from traditional and European-inspired to casually sophisticated, modern and more, making them perfect for today's most tastefully appointed homes.

## More design versatility than natural stone

Peacock Pavers offer far more design versatility than natural stone. They can be installed in regular or random patterns and in custom geometric patterns. They come in many different sizes, from 1' x 1' to as large as 3' x 3', and in thicknesses of 1" and 1 3/4". Driveway pavers of 3" thick also available. Trim pieces, including coping, stair treads, base molding, wall caps and thresholds, are also available.

And in addition to four beautiful standard colors—buff, champagne, rice white and dolphin grey—they can also be produced in custom colors to match whatever palette you have in mind.

## The added beauty of affordability

With Peacock Pavers you get the aesthetics of stone-style flooring at a very affordable price. While our pavers are comparable to Old World stone in beauty, they offer so much more—both natural and custom colors, eco-friendliness, durability for use inside and out. And you get more sizes to choose from. In addition, our large-format 3' x 3' pavers are available at a fraction of the cost of natural stone. With so many benefits, plus the added beauty of affordability, Peacock Pavers are the perfect choice.

## Professional-grade quality for use indoors and out

Prominent architects and designers trust Peacock Pavers for the durability, style and structural integrity they demand for their projects. Our pavers are ideal for interior and exterior installations from floors and swimming pools to outdoor kitchens and driveways.

They install and seal as easily as their natural-stone counterparts and have excellent freeze/thaw characteristics. So rely on them for any project where you want that distinctive stone look, just as noted architects have for nearly 20 years.

## Each paver is handcrafted and unique.

Each Peacock Paver is handcrafted by a skilled artisan. In addition, a special patent-pending rendering process infuses each paver with subtleties of texture and color that evoke the look of ancient crosscut stone. This means that, just as with natural stone, each piece has its own unique characteristics of hue and texture and varies slightly from the others in the same color group.\*

\* To prevent harm to the finish, Peacock Pavers should never be acid-washed except with products recommended by Peacock Pavers. The pavers should never be pressure-washed.

## More eco-friendly than stone

The process of quarrying natural stone consumes excessive amounts of oil, as does shipping the stone from places halfway around the world. Peacock Pavers, on the other hand, require considerably less energy to produce and transport. And they're made of a recyclable material—concrete—and contain no petroleum. So they're perfect for building green. What's more, Peacock Pavers qualify for certification under many LEED projects.
